

EUROPEAN COMMISSION

DIRECTORATE-GENERAL FOR AGRICULTURE AND RURAL DEVELOPMENT

### **Rural development measure templates**

The purpose of these templates is to give guidance to Member states on the detailed information that should be included in the rural development programmes for every rural development measure chosen.

The first part of every fiche is a reminder of the EU requirements (stemming from Regulation 1698/2005 and from the implementing Regulation –articles and Annexes-) to be respected for every measure, plus good practice on implementation of the measure (when existing).

The second part is the suggested template. On the indicators information to be supplied, detailed guidance on the definition and quantification of indicators is included in the Common Monitoring and Evaluation Framework Handbook.
